EXPERIENCE

Founding Engineer

Sep 2025 - Present

Sono

Voice LLM agents for businesses, from pre-sales discovery to pilot delivery.

- Owned product design, development and sales engineering of the company's first product sellable to multiple organisations out of the box, replacing bespoke per-customer builds
- Technical lead on customer sales calls; delivered and closed pilots end to end
- Raised license-plate capture pass rate from ~60% to 93% with a scripted STT provider eval and spelling-alphabet readback; cut perceived agent latency
- Championed adoption of AI coding tools within the team

Python Pipecat TypeScript React

Independent Technical Advisor

Jan 2025 - Present

Miekka Solutions

Freelance technical consulting during parental leave. Secured clients independently and delivered projects in AI, DevOps, and refurbishment operations.

Founder & CTO

May 2024 - Dec 2024

Adeu

Led development of an AI-driven timekeeping system for lawyers.

- Built LLM-powered MVP for automated time tracking in 3 months
- Conducted technical sales and problem validation interviews
- Focused business idea from process management software to time tracking as a shared pain within the industry

C# .NET Azure Semantic Kernel

Founder in Residence

Nov 2023 - May 2024

Antler

Validated SaaS & AI business ideas, conducted market research, and pitched to investors.

- Validated multiple business ideas through market research and user interviews
- Formed a three-person founding team
- Secured pre-seed funding

Software Engineering Manager

Oct 2021 - Nov 2023

Swappie

Led factory software development team focused on refurbishment efficiency and profitability tracking.

- Led team, growing from 4 to 8 people through team merger
- Zero voluntary attrition in team post-layoffs
- Implemented profitability-based repair prioritization through improved warehousing
- Led factory automation projects including robotics integrations
- Started managers roundtable for cross-team problem solving
- Introduced continuous feedback process replacing biannual reviews

Python Django NetSuite GCP

Senior Software Developer

Aug 2020 - Sep 2021

Swappie

Factory software team. Integrated Blancco diagnostics and erasure into operations. Led the NetSuite ERP integration project, streamlining phone refurbishment processes. Promoted to manager based on project leadership.

Python Django NetSuite GCP

Software Developer

Jan 2018 - Aug 2020

Taaleri

Part of the internal startup team that created the Taaleri mobile app and Impakti investment product.

- Built backend for the React Native mobile application
- Integrated CRM and portfolio management systems
- Managed cloud release pipelines and infrastructure

C# .NET TypeScript React React Native Azure
